prompt: this is my current website i made using wordpress. its for class. for my final i need to create a campaign (has to be a subpage on this website) and ill be doing it on final fantasy 14's cookbook. Can you create code similar to the FF14 aesthetic that is compatible with my website theme and WordPress?

my portfolio: <https://rhaque.annenbergrhosting.com/>

website i want to recreate for my final: <https://na.finalfantasyxiv.com/>

prompt: theres a gallery on the ff 14 website i want to replicate. what code do i need?
